

INTUIT INFOSOL PRIVATE LIMITED., (IPL)

“IT IS THROUGH SCIENCE THAT WE PROVE, BUT THROUGH INTUITION THAT WE DISCOVER”.....HENRI POINCARÉ

Who we **Are?**

INTUIT INFOSOL PVT LTD (IPL) got incorporated by budding entrepreneurs with a clear thought in mind to bridge the technology gap in terms of demand and supply of the desired technology solutions with optimal cost and best support in the area of

- 1. Managed Wireless networking,**
- 2. Data security ,**
- 3. CCTV and**
- 4. Video Surveillance.**

The company is committed towards the satisfaction of the customers and makes all possible attempts at all times to achieve this. In all our acts and deeds we keep “**U**” at the centre of our thought process.

Since the inception of our organization, we have inculcated and nurtured Customer orientation and knowledge up gradation, as the fundamental objectives, amongst our Engineers. Regular on-the-job training as well as other learning opportunities are provided to ensure that the staff are ready to provide highest level of technical services to our clients. Our clients have appreciated our Consultative approach in providing right and apt solutions for their needs.

ABOUT IIPL:

“OUR SERVICES STARTS MUCH BEFORE OUR SALES”

We are a committed techno commercial professionals and budding entrepreneurs with more than 10 years of experience in delivering IT solutions. We work as a team and always promote the best solution to cater to your IT needs.

We expertise in the field of:

1. **Data Security – (Hardware and Software) End point protection, Firewall, Routers, UTM etc.**
2. **Managed Wireless Networking – Indoor, outdoor and point to point solutions.**
3. **CCTV and Video Surveillance. – Corporate requirements.**
4. **Structured cabling – Copper and Fibre.**
5. **LAN Switches – Web Managed, L2 and L3.**

The prime focus on the company is to create and deliver value to your business through entire process right from the initial meeting till the successful delivery of the project.

WHY CHOOSE IIPL:

“I BELIEVE IN INTUITIONS AND INSPIRATIONS.....I SOMETIMES FEEL THAT I AM RIGHT, I DON'T KNOW THAT I AM”ALBERT EINSTEIN

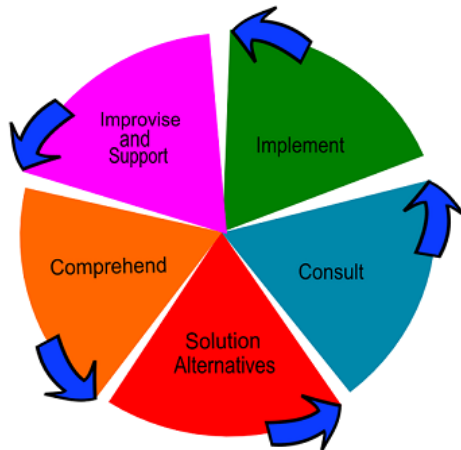

You should rely on us for below reasons:

1. We greatly believe in INTUTION and put our best efforts to accomplish that.
2. **“U”** are the centre of our thought process always.
3. We work in very transparent mode.
4. We always take a consultative approach and provide the right solution to your needs because we believe in the fact that **“THE BEST SOLUTION IS NOT ALWAYS THE COSTLIEST SOLUTIONS RATHER IT IS THE RIGHT SOLUTION”**.
5. We always maintain the quality in our products and services.

6. We are not the cheapest solution provider but we always provide value for money.
7. We strongly believe in the fact that **“EVERY CUSTOMER IS UNIQUE AND EVERY REQUIREMENT IS DIFFERENT”** and therefore we address to your specific requirements.

We always for every customer and requirements follow the 5 basic steps in our sales cycle.

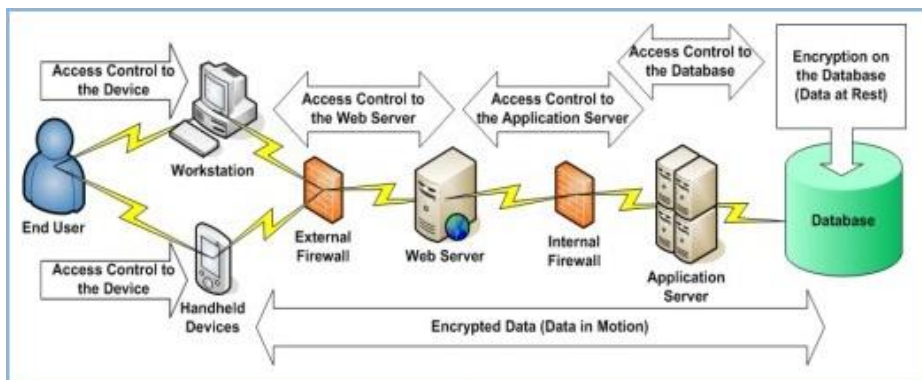

WHAT DOES IIPL DO:

DATA SECURITY:

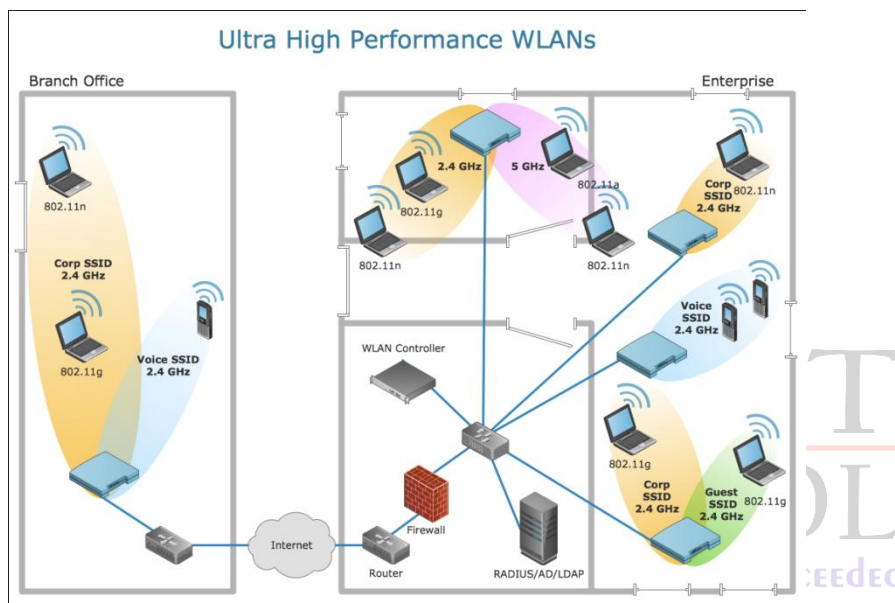

In today's world the data is the most valuable asset in the company. It is of utmost importance to safeguard it from getting it lost or falling into wrong hands. We deal with both software and hardware solution to protect data of your company.

Software-based security solutions encrypt the data to protect it from theft. However, a malicious program or a hacker could corrupt the data in order to make it unrecoverable, making the system unusable. Hardware-based security solutions can prevent read and write access to data and hence offer very strong protection against tampering and unauthorized access.

MANAGED WIRELESS NETWORKING:

Wireless LAN has become an essential component of the enterprise customers today because of the increasing throughput speed and the convenience of use. A wireless local area network (WLAN) links two or more devices over a short distance using a wireless distribution method, usually providing a connection through an access point for Internet access. The use of spread-spectrum or OFDM technologies may allow users to move around within a local coverage area, and still remain connected to the network.

Products using the IEEE 802.11 WLAN standards are marketed under the Wi-Fi brand name. Fixed wireless technology implements point-to-point links between computers or networks at two distant locations, often using dedicated microwave or modulated laser light beams over line of sight paths. It is often used in cities to connect networks in two or more buildings without installing a wired link.

CCTV and VIDEO SURVEILLANCE:

Physical security has become very important it monitors and record the data for further use.

Surveillance is the monitoring of the behaviour, activities, or other changing information, usually of people for the purpose of influencing, managing, directing, or protecting them.

Surveillance is used by Enterprise and Government for intelligence gathering, trainings, prevention of crime, the protection of a process, person, group or object, or for the investigation of crime.

STRUCTURED CABLING AND LAN SWITCHES:

Structured cabling design and installation is governed by a set of standards that specify wiring data centres, offices, and apartment buildings for data or voice communications using various kinds of cable, most commonly category 5e (CAT-5e), category 6 (CAT-6), and fibre optic cabling and modular connectors. These standards define how to lay the cabling in various topologies in order to meet the needs of the customer, typically using a central patch panel (which is normally 19 inch rack-mounted), from where each modular connection can be used as needed. Each outlet is then patched into a network switch (normally also rack-mounted) for network use.

REACH OUT TO IIPL:

Headquartered at Bangalore we are present at the below address and currently serve IT needs in Bangalore and surrounding suburbs.

#48, Ground Floor, 2nd Main, 1st Cross, Manasanagar, Nagarbhavi Circle, Bangalore – 560072.
